

## Advanced Booking

TaxiTapp allows passengers to book rides in advance (ex. meetings, vacations, events). For business professionals, nothing is more convenient than having a ride waiting for you when time is money.

Plan ahead for airport arrivals and visits for conferences in other cities.

## Leave a Note

TaxiTapp allows passengers to leave a note for a driver to notify him/her about any necessary information (stadium parking lot is packed, passenger is wearing a purple coat, need assistance walking to the taxi).

ADD NOTE FOR A DRIVER

×

✓

TaxiTapp allows passengers to alert drivers of the number of bags they will be bringing in the vehicle.

## Cab Availability

Taxi companies usually operate 24/7. Due to Uber drivers being independent contractors, hailing a Uber might be difficult during certain times of the day if a driver thinks there will be a low volume of passenger requests.

There are no cities in the United States where taxi companies are specifically banned. Passengers will never have to worry about their ability to hail a taxi because taxi companies don't break city regulations.

## No Surge Pricing

Taxi companies cannot create "Surge Pricing" when they feel that there will be a high volume demand for rides. Passengers do not need to be dissuaded to book a taxi ride because they believe the rate will be multiplied.

## Handicap/Infant Accessible

If available, TaxiTapp passengers can request a taxi with handicap accessibility. Passengers don't need to feel intimidated that they will be creating a burden for a driver whose vehicle is not accessible. If available, TaxiTapp allows passengers to request a taxi with a child chair.
