

Safety

Due to city regulations, taxis are mandated to be routinely inspected for vehicle safety and performance. Taxi companies are enforced to have quality insurance coverage in case of an unfortunate incident to protect both passengers and taxi companies.

Uber has been criticized for conducting minimal background checks on drivers. Around the nation, there have been news stories of Uber drivers acting unprofessionally towards passengers including criminal behavior.

The Mission

It's time for taxis to come together as one community. Your real enemy is or will be Uber, not your local competitors. Passengers do not want to download multiple taxi applications on their phone. The best way for taxis to be successful and competitive in the future is to consolidate under one application. Encourage other taxis to join TaxiTapp today.
